

Tops in Welding

ARCAL™ with SMARTOP™ and ALTOP™

Shielding gas solutions only from Air Liquide

- ON/OFF valve lever for fast, positive shutoff — improves safety and saves wasted gas
- Visual reading of cylinder contents prevents accidental return before gas is depleted
- ALTOP with built-in regulator eliminates need to purchase and maintain separate regulators
- ARCAL products are blended to meet the most challenging welding applications
- Featuring excellent penetration and wetting with low spattering and reduced fumes
- Homogeneous blends improve gas consistency for greater productivity
- Available in single and 16-cylinder packs
- Extensive line of industrial regulators and equipment available
