

SUGAR CREEK POWER

VALUES CUSTOMER SERVICE, DELIVERY AND PRODUCT ACCURACY

“It means a great deal to us not to have to worry about delivery and accuracy of cylinder gases needed to calibrate our analyzers.”

“ I’m writing this letter to express what a pleasure it is to do business with Scott Specialty Gases.

I’ve been working for over three years with Rejeana, our Scott Customer Service Representative. We deal with a lot of contractors, vendors, and customer reps, but Rejeana is by far the best I have ever dealt with. Not only does she make sure we are up to date on the latest technology and the latest regulations, but she also takes extra care to ensure we receive the proper gas mixtures in the proper ranges for our analyzers.

Our entire operation here at Sugar Creek is all about Safety, Compliance, and Reliability. Reliability of our emissions analyzers is a critical part of this. We need to be sure that we are calibrating our analyzers with accurate products—we want our results to be as close as possible to the components in the cylinders.

Working with Rejeana at Scott, we know that each cylinder is analyzed three times to make sure the Certificate of Accuracy matches what’s actually in the cylinder.

As anyone in the power industry knows, running an electric power plant is a huge job, with countless details to attend to. It means a great deal to us not to have to worry about delivery and accuracy of cylinder gases needed to calibrate our analyzers. We save a lot of time and money each week not having to worry about our cylinder inventory. We order gas and we know it will be here. We don’t have to make repeated phone calls to follow up. It is short and sweet. Based on our experience, I would highly recommend Scott Specialty Gases to anyone. ”

■ **Sugar Creek Power Company, LLC**
 Electric Peaker Power Plant
 West Terre Haute, Indiana

Nominal Capacity: 570 MW
Fuel: Natural gas
Permit Type: Title V, Clean Air Act
Scott Products: NO, CO, O₂, N₂,
